## About Our Report

To pursue sustainable corporate management and enhance information transparency, Solomon Data International Corporation (hereinafter referred to as “Solomon Data International”) has issued its first sustainability report for 2023 (hereinafter referred to as the “Report”), with no restatements of information. Through the issuance of the Report, we explain to stakeholders the Company’s measures and performance in continuously building ethical governance, implementing environmental protection and occupational safety measures, and increasing employee compensation and benefits to achieve the goal of sustainable management, hoping that the stakeholders can pay continuous attention to us and give us valuable suggestions, so that the Company can march forward on the path to implementing sustainable corporate management.

### Reporting Period and Scope

The Report is the first sustainability report of Solomon Data International Corporation. The Report discloses the Company’s financial and non-financial information during January 1, 2023 and December 31, 2023. The scope of the Report covers 100% of the business locations in our parent company-only financial statements. The content includes management approaches, material issues, performance, supply chains, and the environment and society. The Report has been published on the Company’s website.

- Current release date: August 2024 °
- Next release date: June 2025 °

### Report Boundary and Scope

The boundary of the report covers the operating base of Solomon Data International, including its major business locations and plants in Neihu and Nangang. The financial data regarding operating performance is based on the CPA-audited financial statements. For more details, please refer to the 2023 Annual Report of Solomon Data International.

### Principles of Report Preparation

The Report has been prepared in accordance with the following international reporting guidelines and frameworks:

1. GRI Standards issued by the Global Reporting Initiative (GRI)
2. Electrical and Electronic Equipment Industry Standards issued by the Sustainability Accounting Standards Board (SASB).
3. Task Force on Climate-Related Financial Disclosures (TCFD) issued by the Financial Stability Board (FSB)
4. The content of the Report has been prepared by SOLOMON and has been reviewed and confirmed by relevant department heads. However, no third-party assurance has been obtained for the Report.

## **Opinions and Feedback**

You are welcome to contact us regarding any feedback or suggestions on the Report.

## Message from the Management

In 2023, global economy demonstrated significant resilience in the face of multiple challenges. With post pandemic recovery, the global supply chain is gradually recovering. However, geopolitical conflicts, inflationary pressures, and environmental changes continue to affect the markets in various regions.

However, it is worth noting that global attention and investment in renewable energy continue to increase, and energy transformation has become an important issue for governments and enterprises in various countries. Whether in terms of the promotion of carbon reduction targets or the innovation of clean energy technologies, we witnessed the rapid development of energy-related technologies in 2023, particularly in the application of solar energy, wind energy, and energy storage technologies. These reforms not only changed the global energy structure, but also prompted enterprises to rethink sustainable development strategies and integrate environmental responsibilities into their core business.

Solomon Data International Corporation (hereinafter referred to as Solomon Data International) was formerly known as Data International Co., Ltd. which was a professional manufacturer focusing on LCM modules. With the rise of the global energy transition wave, we established the Energy Department in 2021 to promote solar power generation, household energy storage, and commercial energy storage solutions.

We are well aware that as a global corporate citizen, we not only bear the responsibility for economic development, but also have the mission to promote environmental protection and sustainable development. By actively investing in renewable energy, we respond to the global call for carbon reduction. We also hope to provide society with green and reliable energy solutions by introducing innovative technologies.

In the future, we will continue to strengthen corporate governance, improve internal management efficiency, and ensure the transparency and compliance of the Company's operations. With a high sense of social responsibility, we will continuously promote the implementation of ESG (Environment, Social, Governance) concepts and give back to society with our excellent products and services.

**Solomon Data International Corporation**  
**Chairman**  
**Chen Cheng-Lung**

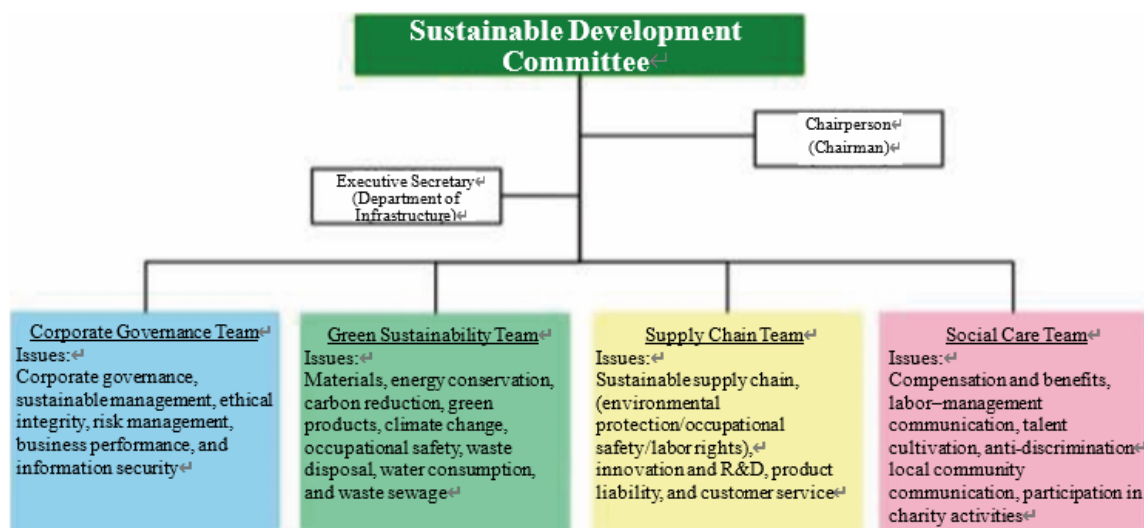

# 1 Sustainable Management

## 1.1 ESG Governance

Since 2019, we have disclosed our fulfillment of corporate social responsibility. We have established the “Sustainable Development Principles” as the highest guiding principles for the Company’s sustainability. The Board of Directors approved the “Organizational Rules for Sustainable Development” in November 2023, and formally established the “Sustainable Development Committee” with Chairman Chen Cheng-Lung and two independent directors as the members. The committee is responsible for making decisions about and promoting sustainable development in terms of corporate governance, the environment, society, and economy.

The Sustainable Development Committee operates in accordance with the Sustainable Development Principles. The committee has four sustainable development promotion teams, namely the Corporate Governance Team, Green Sustainability Team, Supply Chain Team, and Social Care Team. The “Department of Infrastructure” is responsible for the overall management of the committee’s operations, integrating the annual plans and plan implementation of the functional teams, and regularly reporting the implementation results of the year’s action plan to the Board of Directors every year. The status and results of ESG implementation in 2023 and the work plan for 2024 have been reported to the Board of Directors in November 2023, covering the Company’s sustainable governance performance, social issue performance, and environmental issue performance.

Structure of the Sustainable Development Committee

## 1.2 Stakeholder Engagement

The Company identified important stakeholders through discussions based on the five principles of AA1000 Stakeholder Engagement Standard (SES) (responsibility, influence, tension, diverse perspectives, and dependence) in 2023. The five major types of stakeholders identified include shareholders, customers, employees, suppliers, and media. We also made an inventory of the major communication channels :

Stakeholders	Stakeholders' significance to the company	Issue of concern	Communication channel and frequency	Communication practices	Corresponding chapter
<b>Shareholders/ investors</b>	Shareholders are capital providers of a company. A company shall protect the rights and interests of shareholders, treat all shareholders fairly, and ensure that they have the right to fully know, participate in, and decide on the company's material matters.	<ol style="list-style-type: none"> <li>1. Material topic	Significance to the Company	Policy or commitment	Action plan	Target	Evaluation mechanism	Responsible department	Grievance channel
<b>Business performance</b>	Corporate governance is an important mechanism for corporate management. Fulfilling the responsibilities as a corporate operator, creating sound financial performance, and protecting the legal rights and interests of shareholders, as well as the interests of other stakeholders, can ensure the Company's sustainable operations.	1. Establish a sound corporate governance system, formulate the "Corporate Governance Best-Practice Principles," "Ethical Management Principles," and "Code of Ethical Conduct." 2. Take pursuing the best interests of the Company and all shareholders as the operational goal and implement corporate management operations and effective supervision mechanisms to ensure that resources are properly used and enhance competitiveness.	1. The management regularly holds operations meetings to formulate the Company's operations development strategy plan based on the Company's operations and market development trends. 2. Continue to invest in innovation and R&D and develop more competitive products to enhance the Company's operating profit growth and market competitiveness.	To achieve Solomon Data International's management objectives, the Chairman and unit heads will discuss to set challenging growth goals and strategic development directions from a big-picture perspective and transform the strategies into specific implementation plans. As such, the annual strategic planning operating procedures and the responsibilities of each relevant unit have been established.	A business management meeting is held every month to track the progress of the KPIs listed in the annual plan report of each unit. The "Annual Strategic Planning and Action Tracking Table" is used to assess whether each unit has implemented strategic actions and review the implementation with the Chairman. ## 2 Corporate Governance

### 2.1 About Solomon Data International

Solomon Data International Corporation (hereinafter referred to as Solomon Data International) was established in 1990. Its original name was Data International Co., Ltd. Its stock was listed on the Taipei Exchange in 2000 (stock code: 5432). It is headquartered in Neihu, Taipei City. Its parent company is SOLOMON Technology Corporation which holds 70% of Solomon Data International's equity. The shareholders' meeting resolved to change the company name to "Solomon Data International Corporation" in 2021. Solomon Data International is mainly engaged in the sale of solar system components and the processing and sale of LCD modules.

Solomon Data International started as an LCD module manufacturer. In response to the global energy transition trend, the Company began to serve as an agent for SolarEdge's smart energy solutions to undertake large power users' ground and roof solar energy projects. Through the professional green power integration technology, the Company ensures that customers' assets and operations comply with policies and regulations, and further meets market demand.

Driven by climate change and government policies, we actively develop our business in the fields of home, commercial and ground solar, and fishery and electricity symbiosis solutions. We also tailor the best solar energy solutions according to the actual needs of customers. The Company adheres to the business goal of "creating value" and the corporate mission of "satisfying human needs in life," and strives to create "customer value," "employee value," and "shareholder value."

## 2.1.1 Company History

Time	Major milestone
1990	Officially established and entered the market as a LCD module manufacturer.
1991	Started to serve as an agent in the U.S., Korea and Israel.
1994	Started to serve as an agent in the UK.
1995	Relocated the headquarters to Xizhi and established the Donghu Plant at the original site of the headquarters.
1996	The Company's ISO 9002 system was certified by RWTUV.
1999	Won the [8th National Award of Outstanding SMEs].
2000	The stock of the Company was listed on March 21.
2021	On August 9, the subsidiary Data International Co., Ltd. was renamed Solomon Data International Corporation upon approval by the Taipei City Government.
2021	The stock of the Company was officially listed on the Taipei Exchange on September 30.
2023	Set up the "Sustainable Development Committee" upon approval by the Board of Directors.

## 2.1.2 Corporate Governance Structure

The Board of Directors is the Company's highest governance body and decision-making center for major business strategies. The Board of Directors fulfills its supervisory responsibilities with a prudent attitude, and considers the Company's interests as a priority in supervising and directing the Company's management team. It also prevents conflicts of interest, ensures the Company's compliance with various laws and regulations and the Company's Articles of Incorporation, and evaluates operating strategies, ESG performance, and risk control. The Company has established the "Audit Committee," "Compensation Committee," and "Sustainable Development Committee" to report to the Board of Directors on operational activities and decisions on a regular basis to ensure the independence and fairness of corporate operations.

### Solomon Data International - Organizational Chart

### 2.1.3 Business Performance and Brand Value

In 2023, global macroeconomic and geopolitical factors still existed. With the post-pandemic reconstruction of business operations and an increasing international focus on ESG and green sustainability, it was as if we were entering a whole new competition. Each step must be taken with greater caution. For Solomon Data International, it has always been our mission to maintain professional R&D capabilities, excellent teamwork, and solid industry experience while continuously creating value for our customers, employees, and shareholders.

In 2023, the consolidated operating income amounted to NT\$259 million, the profit after tax was NT\$0.29 million, and the after-tax EPS was NT\$1.41.

#### Direct Economic Value Generated and Distributed in the Past Three Years

Unit: NT\$ thousand

	Production capacity	Production volume	Production value	Production capacity	Production volume	Production value
LCD modules	415	350	53,677	415	238	36,435

### Solomon Data International’s Industrial Value Chain

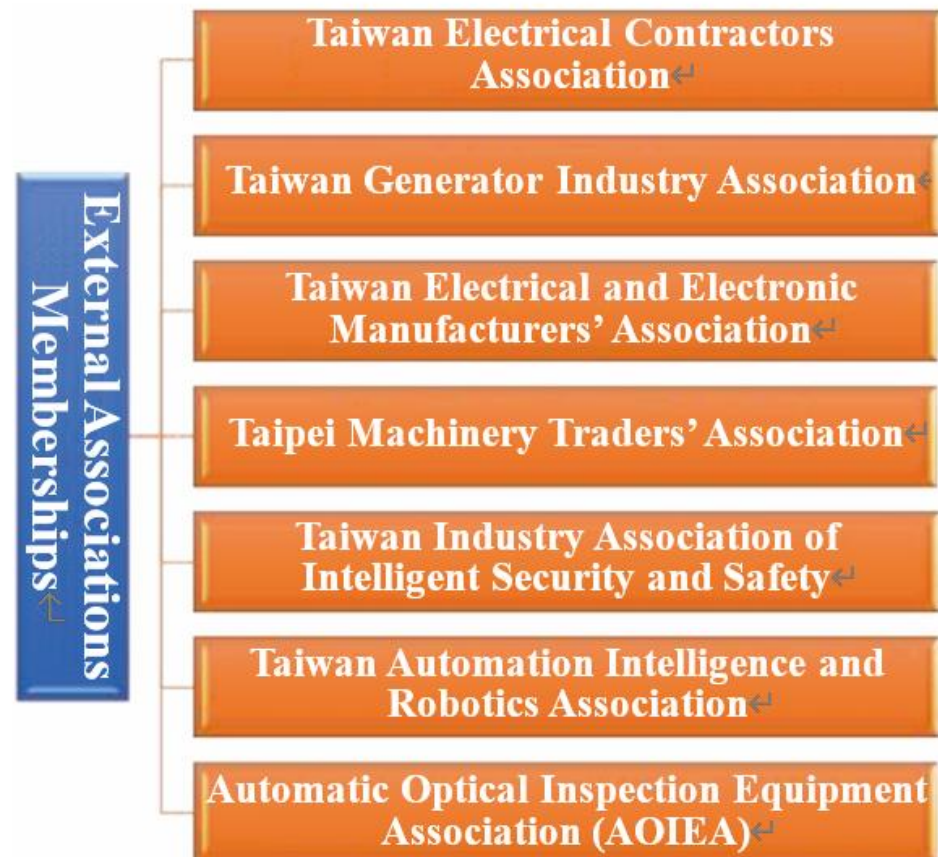

Solomon Data International is mainly engaged in services related to LCD modules and TFT-LCM parts and components. In addition, the Company plans to serve as an agent for BUI, PCS, batteries, SE330K, and other related products, continuously expanding the Company’s business territory to bring more benefits to the Company.

In terms of the relationship between product-related industries, we continue to maintain close partnerships. An overview of the relationship among the upstream, midstream and downstream industries is as follows :

	Upstream	Midstream	Downstream
<b>LCD/ LCM</b>	Suppliers of equipment, materials, and parts	LCD panel manufacturing and LCD module assembly	Communication products, medical devices, home appliances, office equipment, automotive products, etc.
<b>Solar energy</b>	Developers, owners, etc.	EPC contractors	Solar energy modules, inverters, peripheral power/structure, etc.

## Participation in External Associations

In addition to improving our own product competitiveness, we also actively communicate with various stakeholders. Through participation in industry-related associations, the Company has positive interactions with association members and understands the latest development trends in the industry.

## 2.1.4 Composition and Operation of the Board of Directors

The Company's Articles of Incorporation specifies that the candidate nomination system shall be adopted for the election of directors and that directors shall be elected by shareholders from the list of director candidates. The Company's Board of Directors has 7 directors with extensive knowledge and experience. They were elected for a term from Jul 9, 2021 to Jul 8, 2024. Information on the current members of the Board of Directors is as follows:

The 3 independent directors account for 42.86% of all board members. All the 3 independent directors meet the independence requirements and have served for less than 3 consecutive terms.

To achieve the goal of diversification of the Board of Directors, the members of the Board of Directors have rich experience and expertise in operations management, finance, business management, crisis handling, industrial knowledge, etc., enabling them to make full discussions with committees and make recommendations for the reference of the Board of Directors to improve the operational performance of the Board of Directors and effectively perform its supervisory functions. Due to business needs, Chairman Chen Cheng-Lung concurrently serves as the General Manager. If the Chairman himself or the juristic person he represents has interests in a meeting agenda item, the Chairman shall explain the important content of the interests at the current board meeting. If the interests may harm the interests of the Company, the Chairman shall not participate in and shall recuse himself from the discussion and voting, and is not allowed to exercise voting rights on behalf of another director. The Company has fully communicated with directors on the recent operations and development strategies of the Company. For the structure and background of the Board of Directors, please refer to [Official Website](#).

Director  
Background

2023 Annual  
Report

## Operation of the Board of Directors

The Board of Directors shall at least have one meeting every quarter in accordance with the Company's Articles of Incorporation. In 2023, a total of 4 board meetings were held, with an average director attendance rate of 100%. In order to implement corporate governance and enhance the efficiency of the Board of Directors, the Company's directors have formulated the "Board of Directors Performance Evaluation Measures" to specify the performance evaluation cycle, evaluation period, evaluation scope and method, evaluation implementation unit, evaluation procedures and other requirements to be complied with for the Board of Directors. In the 2023 performance evaluation for the Board of Directors, the board members and the agenda working group reviewed directors' awareness of their responsibilities, internal control, participation in the Company's operations, and continuing education, and completed the questionnaire for self-evaluation. The evaluation results were reported to the Board of Directors. Please refer to the 2023 Annual Report for details. When the Company's directors assume office, they sign a Consent to Act as Director to agree to faithfully perform their duties and exercise due care as a good administrator in accordance with Article 23 of the Company Act. According to the Company's "Corporate Governance Best-Practice Principles" and "Rules of Procedure for Board of Directors Meetings," if a director or the juristic person the director represents has interests in a proposal listed in the board meeting's agenda, the director shall explain the important content of the interests at the current board meeting. If the interests may harm the interests of the

Company, the director shall not participate in and shall recuse himself/herself from the discussion and voting, and is not allowed to exercise voting rights on behalf of another director. In order to ensure sound financial and business transactions between the Company and related parties and prevent non-arm's length transactions and improper transfer of benefits during the purchase and sale of goods, acquisition or disposal of assets, provision of endorsements and guarantees, and loaning of funds between related parties, the Company has required compliance with the "Corporate Governance Best-Practice Principles for TWSE/TPEX Listed Companies."

### Continuing Education of Directors

To continuously build the professional knowledge and skills of the board members in corporate governance, ethical management, securities regulations, sustainable management, and corporate social responsibility, the Company arranges for or encourages directors to participate in external forums and continuing education courses every year. The continuing education of directors in 2023 is as follows :

Course title	Continuing education hours	Organizer	Participating directors
New-generation Enterprise Threat Management and Prevention: Reconstructing Cybersecurity from the Perspective of Digital Forensics	3	Taiwan Corporate Governance Association	Chen Cheng-Lung, Kao Kuan-Yin, Yu Wen-Pin, Liang Li-Jen Chiang Chien-Chih, Yuan Hsing-Chih

Practical Advanced Seminar for Directors, Supervisors (Including Independent Directors), and Chief Corporate Governance Officers - 2030/2050 Green Industrial Revolution	3	Securities and Futures Institute	Yuan Hsing-Chih

## 2.1.5 Functional Committees

The Company's Board of Directors has established three functional committees, namely the "Audit Committee," "Compensation Committee," and "Sustainable Development Committee," to provide reference for the Board of Directors' decision-making.

### ➤ Audit Committee

The Company established the "Audit Committee" in July 2021 to replace the original supervisor system in accordance with the Securities and Exchange Act. The Audit Committee aims to assist the Board of Directors in supervising the quality and integrity of the Company's accounting, auditing, financial reporting, and financial control. The Company's Audit Committee consists of 3 independent directors, serving a term of 3 years. All members elect one of them as the convener and meeting chairperson.

The Company's Audit Committee operates mainly to supervise the following matters :

1. Appropriate presentation of the Company's financial statements.
2. Appointment (dismissal), independence, and performance of CPAs
3. Effective implementation of the Company's internal control.
4. The Company's compliance with relevant laws, regulations, and rules.
5. Management and control of existing or potential risks of the Company.

The Audit Committee holds at least one meeting per quarter in accordance with the Company's "Organization Rules of the Audit Committee." In 2023, a total of 4 Audit Committee meetings were held, with a member attendance rate of 100%.

## ➤ **Compensation Committee**

In order to implement corporate governance and improve the compensation system for directors and managerial officers, the Company has established the “Compensation Committee” with the 3 independent directors appointed by the Board of Directors to serve as the 3 members. The Compensation Committee is responsible for assisting the Board of Directors in formulating and regularly reviewing and evaluating the performance evaluation and compensation policies, systems, standards and structures for directors and managerial officers. The committee submits their suggestions to the Board of Directors for discussion and making resolutions. One of the independent directors serves as the convener.

The Compensation Committee holds at least 2 meetings per year in accordance with the “Organizational Rules of the Compensation Committee.” In 2023, a total of 2 Compensation Committee meetings were held, with a member attendance rate of 100%.

According to the Articles of Incorporation, if the Company makes a profit in the year, no more than 2% of the profit shall be appropriated as director remuneration. The percentage of the profit to be distributed as director remuneration shall be determined by a resolution adopted with the consent of a majority of all attending directors at a board meeting with more than two-thirds of board members present and shall be subsequently reported at a shareholders’ meeting. Considering their independence, the Company’s independent directors are not linked to the Company’s operating performance and do not participate in the distribution of director remuneration. They are paid a monthly remuneration. Transportation allowances for directors are determined by the Compensation Committee and the Board of Directors with reference to the general level in the industry and based on whether the director serves as a member of functional committees.

## ➤ **Sustainable Development Committee**

In 2023, the Company implemented continuous transformation in response to sustainable development. The Board of Directors approved the “Organizational Rules for Sustainable Development” in November 2023, and formally established the “1st Sustainable Development Committee.” The Board of Directors resolved to appoint Chairman Chen and 2 independent directors as the members. The “Department of Infrastructure” acts as the “Executive Unit” of the Committee to comprehensively manage the Committee’s operations and integrate the annual plans and execution of each “functional team.” Please refer to [1.1 ESG Governance](#) for details.

## **Internal Audit Unit**

We have established effective accounting and internal control systems to implement ethical management. The internal audit unit, namely, the Auditing Office, has formulated relevant audit plans based on the result of assessment of the risks of unethical behavior. An audit has also been conducted to assess compliance with the unethical behavior prevention plan in accordance with the foregoing plans. Audit findings and improvement results are regularly reported to the Audit Committee.

**Audit scope :**

The internal audit unit reviews the overall internal control system and operating procedures of the Company, and assesses whether the design and execution of controls are appropriate, in order to achieve the purpose of the internal control system. The scope mainly covers the important operations of the parent company and subsidiaries.

The internal audit organization and its operation are disclosed on the official website

In order to continuously improve the overall professional knowledge of the Company's internal auditors and comply with laws and regulations, the auditors participate in external professional courses in accordance with the law and receive continuing education.

The continuing education courses for the auditors of Solomon Data International in 2023 are as follows :

Company	Title	Certificate description	Organizer	Continuing education hours
Solomon Data International	Chief Auditor	Discussion on the Latest Regulations on Cybersecurity and Audit Practices	Securities & Futures Institute	6
Solomon Data International	Chief Auditor	Enhancement of Corporate Sustainable Value and Improvement of the Risk Management System	The Institute of Internal Auditors-Chinese Taiwan	6
Solomon Data International	Deputy Auditor	Fraud Auditing Practices – A Case Study of Procurement	Securities & Futures Institute	6
Solomon Data International	Deputy Auditor	A Discussion on the Methods of Improving Compliance Auditing Based on Sanction Cases	Securities & Futures Institute	6

## **2.2 Ethical Management**

The Company values ethical management. “Righteousness, Integrity, Diligence and Thrift” have always been the core management philosophies of the Company. We have formulated the “Code of Ethical Conduct” and the “Ethical Management Principles” for compliance by directors, managerial officers, employees, appointees, or persons with substantial control. The HR Department, Legal Affairs Department, and Infrastructure Team responsible for promoting corporate ethical management assist the management in establishing and supervising the implementation of ethical management policies and anti-corruption and anti-bribery plans, and regularly report audit results to the Board of Directors. The Company promises that all the Company’s directors, managerial officers, employees, appointees, and persons with substantial control shall comply with laws and regulations, avoid conflicts of interest and pursuing personal gains, fulfill the duties of confidentiality, care, and loyalty, prohibit unfair and insider trading, and have the responsibility to protect and properly use the Company’s assets.

When engaging in business transactions with others, the Company assesses the legitimacy of the counterparty, fully understands the status of the counterparty’s ethical management and compliance with the corporate social responsibility policy, and clearly expresses refusal to directly or indirectly offer, promise, request or accept any improper benefits in any form or name. The Company specifies compliance with the clauses on ethical management and corporate social responsibility in the contract. We adopt a zero-tolerance policy against corruption and bribery, and promise that there will be no corruption and bribery in any form in the course of business activities.

The Company extends the corporate culture and the spirit of integrity to all employees to create a sound market and environment, implementing the principles of fairness and reasonableness, equality and mutual benefits, and integrity. We value and protect consumer rights and interests to implement the Company’s ethical management policy and philosophy. Employees must sign the “Employee Code of Ethical Conduct” when they report to work, and the Company’s suppliers must sign a “Letter of Commitment to Integrity” to promote legal education within and outside the organization. In addition, the Company regularly publishes electronic propaganda and organizes physical courses every year. In 2023, a total of 73 employees participated in education and training on ethical management and laws and regulations, totaling 211 hours. This could further incorporate the concept of integrity in employees’ daily work.

### **Whistleblower System and Protection**

In order to establish a corporate culture of integrity and transparency and to promote sound management, the Company has formulated the “Social Responsibility and Ethics Policy” to specify the acceptance and investigation schedule, acceptance unit and investigation unit. We have also established and announced the whistleblowing email address and other acceptance channels on the official website and internal website for use by internal and external personnel. The Company continues to collect and actively deal with customer grievances and employee opinions, and keeps the identity of whistleblowers confidential, prohibits any adverse personnel measures, and allows anonymous reporting to actively prevent unethical, fraud and criminal behavior.

Whistleblowing email address : [119@solomon.com.tw](mailto:119@solomon.com.tw)

## **2.3 Risk Management and Legal Compliance**

The Company's corporate development mission is to achieve sustainable management. Implementing comprehensive and rigorous risk assessment management and effective crisis management is a critical cornerstone to ensure sustainable management. In order to reduce the economic loss and negative impact of any risk or disaster events, thereby protecting the rights and interests of all stakeholders and maintaining the Company's image, we actively carry out corporate risk management and crisis prevention, so as to respond to possible crises timely and maintain stable and sustainable corporate operations.

In 2023, Solomon Data International did not receive any penalties from competent authorities for anti-competitive, anti-trust and anti-monopoly behavior, corruption, and major violations.

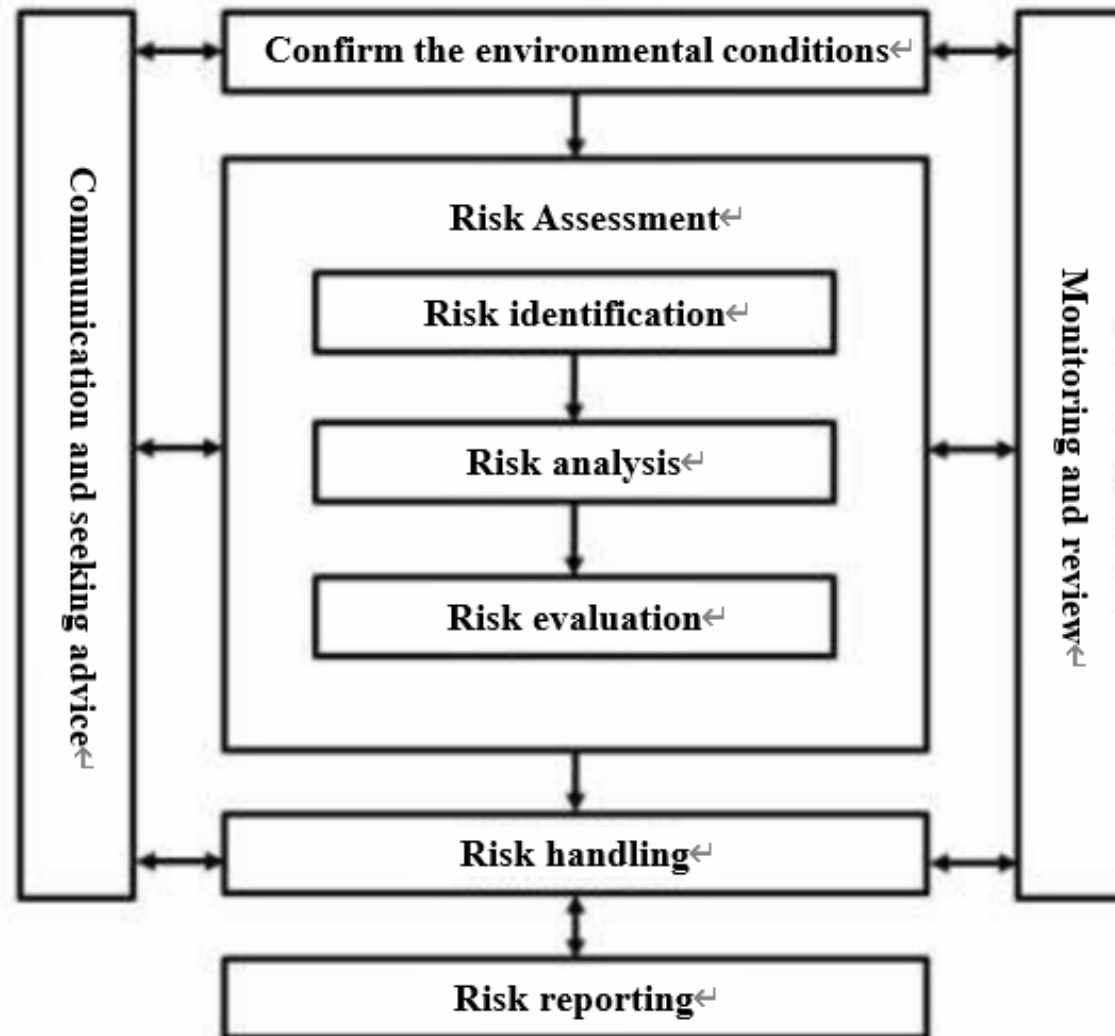

### **2.3.1 Risk Management Strategy**

The Board of Directors, Audit Committee, and Compensation Committee supervise and audit the Company's operations. The Board of Directors communicates corporate social responsibility issues related to economy, environment, and society. The Company has also referred to the principles of the Group's ISO 9001 quality management system and ISO 30001 risk management system. Through the analysis of internal and external issues and the issues of concern to stakeholders, we understand the environment in which the Company is operating and formulate the Company's management policy to ensure the effective operation of quality management. Risk management standards for the Company's organizational background and stakeholders are established to respond to potential risks and opportunities brought about by environmental changes and take countermeasures or control measures in advance based on risk assessment results. We formulate business plans, and conduct strict control through internal operating procedures, continuously make process improvements, and update documents to ensure their timeliness and security. In addition, by having the audit unit conduct audits and inspections from time to time and establishing various management systems, we minimize possible risks. The Risk Management Team shall report the annual audit plan and implementation results to the ESG Development Committee on a regular basis.

### **2.3.2 Risk Assessment Management Procedure**

Risk management is performed by units at all levels according to their management responsibilities and work requirements. Awareness of risks is required for work plans and various system processes implemented on a daily basis. We have completed the Plan-Do-Check-Action (PDCA) cycle. The Risk Management Team shall appoint the convener of the evaluation team according to the plan. In addition to keeping track of the development of international and domestic risk management systems at any time, the Risk Management Team shall also regularly review the Company's corporate risk management policies and procedures, and submit review and improvement suggestions to the Sustainable Development Committee and the Board of Directors for discussion.

The risk management procedure is as follows :

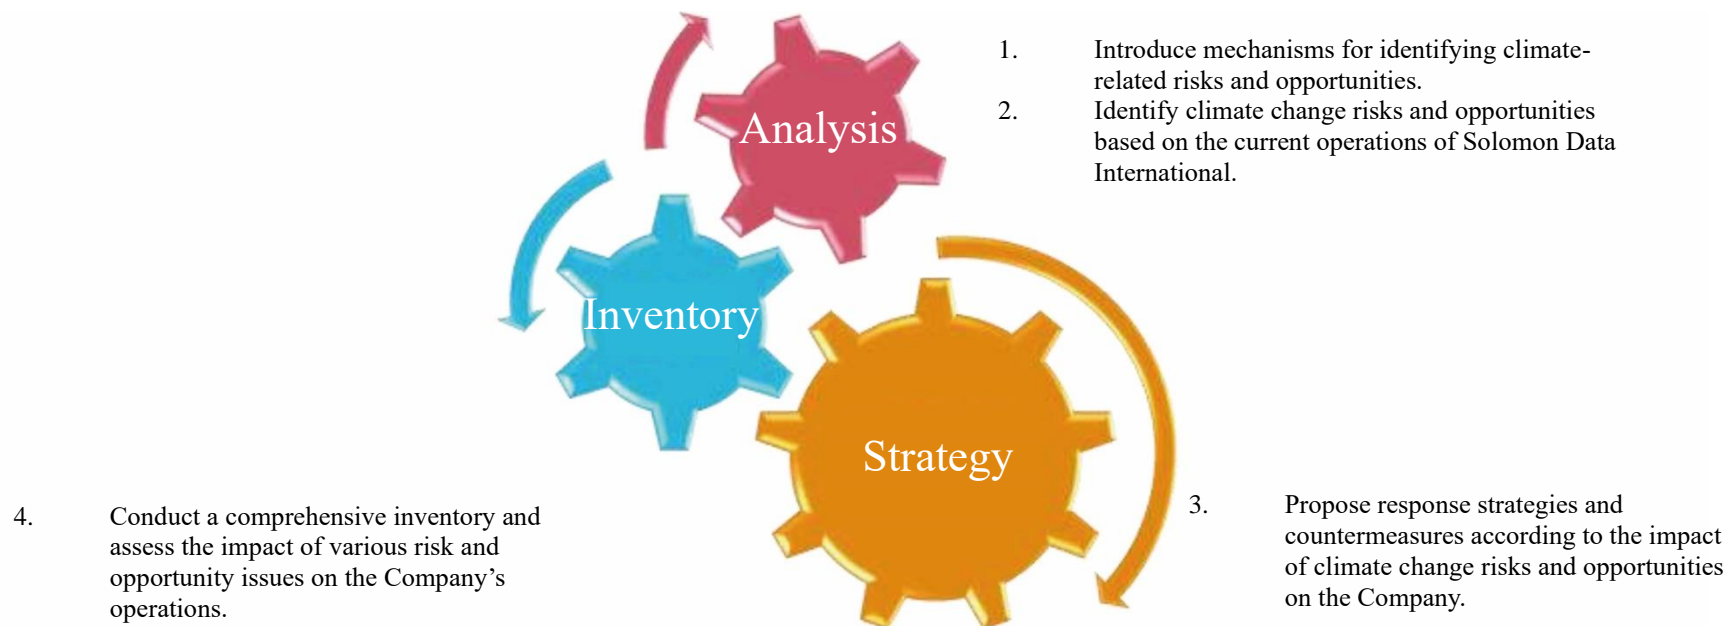

### 3 Environmental Protection

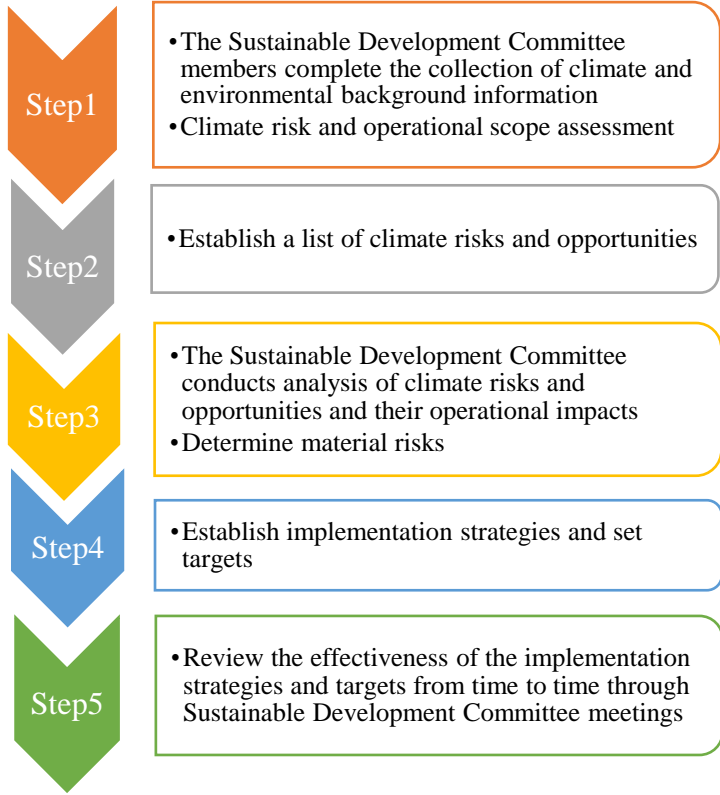

We have always upheld the concept of environmental friendliness and sustainable development in our operations. We have control measures in place for energy, GHG emissions, water resource management, and waste, among others, to minimize the negative impact on the environment.

#### 3.1 Climate Action

Due to worsening extreme weather in recent years, climate change issues have received global attention. In addition to identifying risks related to corporate operations, the Company also uses the content and suggestions of the TCFD (Task Force on Climate-Related Financial Disclosures) as a reference in disclosing the risks and opportunities of the Company’s climate-related issues and formulating strategies and countermeasures. We have established a risk framework with four core disclosure elements, namely “governance,” “strategy,” “risk management,” and “metrics and targets,” to understand the impact of climate change risks and opportunities on the Company, thereby proposing countermeasures.

## Climate Change-Related Financial Disclosures

Governance	Strategy	Risk management	Metrics and targets
<p>The Company has established the “Sustainable Development Committee,” chaired by the General Manager, and its various teams conduct identification of climate-related risks and opportunities through discussions in meetings.</p>	<ol style="list-style-type: none"> <li>Solomon Data International takes the urgency of climate risk management seriously. To ensure sustainable operations, the Company has conducted identification, inventory, and evaluation of various risk and opportunity issues and their impact on the Group’s operations with reference to the analysis of climate-related risks and opportunities in order to adopt corresponding strategies.</li> <li>There were 2 risks and 2 opportunities identified as material and relevant to the Company based on the level of impact.</li> </ol>	 <ul style="list-style-type: none"> <li><b>Step 1</b> <ul style="list-style-type: none"> <li>The Sustainable Development Committee members complete the collection of climate and environmental background information</li> <li>Climate risk and operational scope assessment</li> </ul> </li> <li><b>Step 2</b> <ul style="list-style-type: none"> <li>Establish a list of climate risks and opportunities</li> </ul> </li> <li><b>Step 3</b> <ul style="list-style-type: none"> <li>The Sustainable Development Committee conducts analysis of climate risks and opportunities and their operational impacts</li> <li>Determine material risks</li> </ul> </li> <li><b>Step 4</b> <ul style="list-style-type: none"> <li>Establish implementation strategies and set targets</li> </ul> </li> <li><b>Step 5</b> <ul style="list-style-type: none"> <li>Review the effectiveness of the implementation strategies and targets from time to time through Sustainable Development Committee meetings</li> </ul> </li> </ul>	<p>To control the impact of climate change on the operations of the Company, we set short-term and medium- to long-term targets and regularly review and track the energy consumption and GHG emissions of our offices and plants in each region to achieve the targets and continuously expand the effectiveness of energy conservation and carbon reduction.</p> <p>Short-term target (by 2027): Reduce GHG emissions by 2% compared to the base year of 2023.</p> <p>Medium- to long-term target (by 2030): Reduce GHG emissions by 5% compared to the base year of 2023.</p>

Solomon Data International’s Sustainable Development Committee discussed and identified climate risks and opportunities through meetings. It collected 16 climate-related risk topics and 10 climate-related opportunity topics, assessed the likelihood of the topics and their level of impact on the Company’s operations, and finally, identified two risks and two opportunities. The identified topics were discussed for their impact and response mechanisms.

**Solomon Data International’s List of Climate Risks and Opportunities**

No.	Issue	No.	Issue
R1	Increasing GHG emissions pricing	O1	Adopting more efficient transportation methods
R2	Strengthening emissions reporting obligations	O2	Using more efficient production and distribution processes
R3	Requirements and supervision of existing products and services	O3	Recycling and reuse
R4	Facing the risk of litigation	O4	Switching to more efficient buildings
R5	Replacing existing products and services with low-carbon goods	O5	Reducing water use and consumption
R6	Failed investment in new technologies	O6	Using low-carbon energy
R7	Cost of low-carbon technology transformation	O7	Adopting incentive policies
R8	Changes in customer behavior	O8	Using new technologies
R9	Market information uncertainty	O9	Participation in the carbon trading market
R10	Rising costs of raw materials	O10	Switching to non-centralized energy
R11	Changes in consumer preferences - industry stigmatization		
R12	Increase in concerns and negative feedback from stakeholders		
R13	Increased severity of extreme weather events such as typhoons and floods		
R14	Changes in rainfall (precipitation) patterns and extreme changes in climate patterns		
R15	Rising average temperatures		
R16	Rising sea level		

Note: The items highlighted in yellow in the above table are the identified four risks and four opportunities.

## Risk identification and response

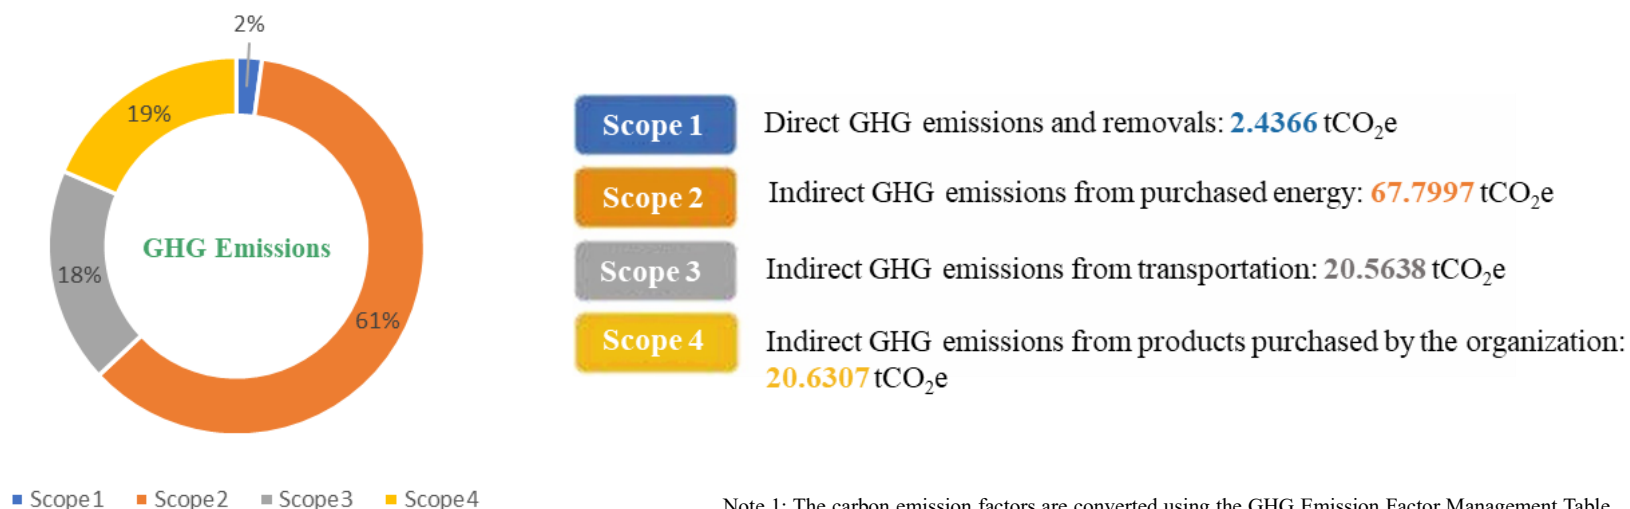

Risk	Potential financial impact	Countermeasure
<b>Rising costs of raw materials</b>	Fluctuating prices of raw materials can result in increased production costs	<ul style="list-style-type: none"> <li>● Focus on product categories, implement centralized procurement where goods are purchased in large quantities and at low prices, and reduce inventory types.</li> <li>● Introduce a lean production model in plants to optimize the production process and eliminate waste.</li> <li>● Establish long-term partnerships with suppliers to strive for more favorable procurement prices.</li> <li>● Actively seek alternative raw materials to increase product liquidity and flexibility in response to rising costs of raw materials.</li> <li>● Formulate long-term production procurement plans, including fixed price contracts, to mitigate the impact of sudden energy cost changes on business.</li> <li>● Track the fluctuation of commodity prices and grasp the procurement schedule to reduce the risk of future price fluctuations.</li> </ul>
<b>Rising average temperatures</b>	Increased use of energy leads to higher electricity bills	<ul style="list-style-type: none"> <li>● Formulate the Company's energy-saving measures, regularly maintain air-conditioning equipment, and increase energy efficiency.</li> <li>● Reduce paper consumption, carry out document digitization, and reduce carbon emissions.</li> <li>● Execute carbon inventory every year to understand the Company's main sources of carbon emissions, facilitating the planning of carbon reduction measures.</li> </ul>
Opportunity	Potential financial impact	Countermeasure
<b>Using more efficient production and distribution processes</b>	Increasing utilization efficiency to reduce operating costs	<ul style="list-style-type: none"> <li>● Prioritize equipment with better energy efficiency to reduce the impact on the environment.</li> <li>● Introduce an occupational safety and health system to protect the safety of employees at work and enhance work efficiency.</li> <li>● Increase equipment availability to improve production efficiency.</li> <li>● Reduce delivery time, meet customer needs, and increase inventory turnover.</li> </ul>
<b>Using new technologies</b>	Changing customer preferences to improve competitiveness	<ul style="list-style-type: none"> <li>● Build a clean, low-carbon, safe, and high-efficiency new energy system and make great efforts to promote low-carbon transformation.</li> <li>● Develop AI vision and PTC augmented reality solutions, systems, and application technologies to significantly reduce operating costs caused by human error in the manufacturing industry while contributing to environmental protection.</li> <li>● Explore high value-added products.</li> </ul>

## 3.2 GHG and Energy Conservation Management

### 3.2.1 GHG Management

In recent years, global warming has intensified, causing extreme weather and climate change issues to come to light. The Company pays attention to domestic and foreign environmental issues, including global warming, air quality, pollution, and the availability of natural resources. In order to effectively achieve energy conservation and carbon reduction, the Company introduced GHG inventory and passed third-party verification to ensure data accuracy in 2022. In 2023, we expanded the inventory scope to include the business locations in the consolidated financial statements to comprehensively review the Company's carbon emissions.

The Company's Category 1 emissions mainly came from mobile combustion sources and fugitive emission sources; Category 2 emissions were from purchased electricity; Category 3 emissions were from employee business travel. In addition to the energy conservation and carbon reduction policies implemented internally, we also hope to understand the Company's main sources of emissions through GHG inventory to formulate relevant reduction measures, thereby reducing carbon emissions and fulfilling corporate social responsibility.

Note 1: The carbon emission factors are converted using the GHG Emission Factor Management Table Version 6.0.4

Note 2: The above GHG inventory data has been verified by a third party to represent the Company's Category 1, Category 2, and Category 3 (business travel) emissions.

### 3.2.2 Energy Management

The Company is mainly engaged in the sale of solar system components and the processing and sale of LCD modules. The energy used is mainly purchased electricity, followed by the products purchased by the organization. In order to make good use of resources and save energy, the Company gradually replaces lighting fixtures with energy-saving LED lamps. In addition, the Company also implements energy control in the offices and plants, and turns off non-essential power after hours.

#### Energy and Carbon Emissions Management in the Past Two Years

The Company has been promoting and integrating building environmental protection activities, such as office energy conservation measures, improving the utilization efficiency of various resources, including the efficient use of paper, water, and electricity, properly disposing of industrial waste, sorting recyclable and reusable waste for reuse, and promoting resource recycling, in order to reduce the impact of operations on the environment. To ensure that each plant can maintain good power-saving habits, we have continuously promoted energy conservation and carbon reduction measures. The Company's GHG emissions continued to decrease in 2023, and the emission intensity was reduced by 0.43 compared to 2022.

Note:

1. Emission intensity = Total GHG emissions / Operating income of the year (NT\$ millions)
2. Energy intensity = Total energy consumption (GJ) / Operating income of the year (NT\$ millions)

### 3.2.3 Waste Disposal

In terms of waste generation, we adhere to the principle of turning waste into resources and maximizing their use, and try our best to reduce the amount of waste generated. We treat waste mainly by recycling, supplemented by final disposal. The Company's control measures mainly focus on domestic waste. We require our offices and plants to implement waste sorting to avoid disposal problems caused by littering of garbage. Waste is sorted into domestic waste (non-recyclable), plastics, paper, and bottles/cans according to types. We ensure the implementation of waste sorting and recycling.

The treatment of all the Company's waste is outsourced to external contractors. All our waste disposal contractors are legal entities. For office operations, we have also made an all-out effort to promote paperless operations or double-sided printing to reduce waste generation as much as possible.

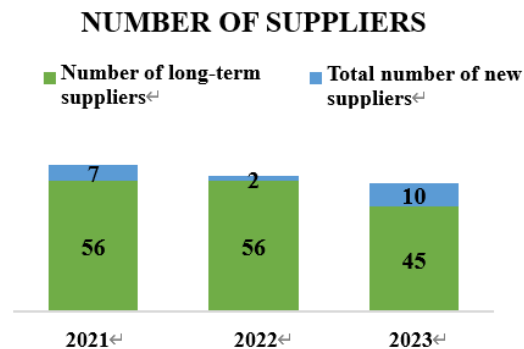

### 3.3 Sustainable Supply Chain

Supply chain management is also a major issue for corporate sustainable development. In addition to striving for sustainable development, we also work with suppliers to ensure the quality of the products they provide and march toward sustainable development. Suppliers are an important partner for our operations. Through effective supply chain management mechanisms, we create a win-win situation with suppliers and drive the sustainable common good of the supply chain.

#### Supply Chain Management

Solomon Data International plans to establish supplier environmental and social screening standards in 2024 with reference to the RBA Code of Conduct. All suppliers must sign an “Letter of Commitment to Integrity” and “Occupational Safety and Health Survey Form” to promise that they will not violate the Company’s Supplier Code of Conduct, covering labor rights, environmental protection, safety and health, ethics and management, in order to ensure their compliance with the occupational safety and health requirements of national laws and regulations before purchasing goods and receiving services. We also distribute a self-evaluation questionnaire regarding the “Supplier/Contractor Social Responsibility Guidelines” for suppliers to evaluate their implementation of sustainable development issues related to the environment and society. The Company will then analyze the questionnaire results. For suppliers falling short of standards, we will formulate improvement measures to make continuous improvements with them. Through a series of supplier management policies, we hope to improve the effectiveness of responsible supply chain management, reduce the operational risk of the supply chain, and build partnerships for sustainable growth, moving toward sustainable development.

Through multi-faceted digital transformation, we communicate and collaborate with information and communication suppliers in various aspects. In 2023, a total of 10 new suppliers joined the Group’s supply chain system, and every one of them was reviewed according to the supplier review principles to ensure that they met our environmental and social requirements for suppliers and followed the sustainable supply chain development policy and code of conduct of SOLOMON.

## **Supply Chain Management Goals**

In 2023, we conducted an occupational safety and health performance evaluation for our suppliers, which mainly covered external security and cleaning services, and provided management and assistance according to the evaluation result.

As geopolitical conflicts, inflationary pressure, economic recession, climate events, and cybercrime will be the key factors affecting the supply chain in the future, we need to work with supply chain partners to formulate strategies to mitigate the risks in the supply chain. Higher customer and consumer requirements for products will force the supply chain to change and develop promptly. Modern business activities emphasize technology and innovation, leading to more complex supply chains. Therefore, our supply chain and business activities need to be integrated to support the current and future business development.

We are committed to creating a supply chain that aims for sustainable development. To ensure the safety of work environments in the supply chain, employee dignity and respect, and business operations that promote environmental protection and comply with ethical standards, we have formulated supplier-related management regulations to jointly implement corporate social responsibility and create a sustainable value chain.

## **Responsible and Sustainable Supply Chain**

As a world citizen, we have not only declared and pledged to prohibit the use of metals from conflict mining areas, but also required all suppliers to sign a “Declaration for Non-use of Conflict Minerals” and “Supplier/Contractor Social Responsibility Guidelines” to comply with the following :

- ✓ Make sure that all metals including: gold (Au), tantalum (Ta), tungsten (W), cobalt (Co), and tin (Sn) are not from mining areas in countries or regions that do not comply with the requirements of “Conflict-Free,” are not obtained through autonomous armed groups or illegal groups, are not from mining areas in conflict regions, and are not obtained through illegal smuggling. (The United Nations Security Council has determined that all minerals from the Democratic Republic of Congo (DRC), Rwanda, Uganda, Burundi, Tanzania, and Kenya are DRC-mined minerals.)
- ✓ The R&D, procurement, manufacturing, provision, or sale of products or services provided by suppliers/contractors shall comply with related laws and regulations and international standards to ensure the information transparency and safety of the products and services. Suppliers/contractors shall also establish and disclose their protection policy for consumers or other stakeholders’ rights and interests, and implement them in their operations to prevent products or services from directly or indirectly harming the rights and interests, health, and safety of consumers or other stakeholders.
- ✓ Reduce the purchase and use of raw materials and commodities that are harmful to the environment, and strive to increase the use of green products.
- ✓ Adhere to the ethical management policy and refrain from directly or indirectly offering, promising, requesting or accepting any improper benefits and engaging in unethical behavior such as committing illegal acts or breaching fiduciary duty.
- ✓ Prohibit child labor, forced labor, discrimination, harassment, abuse and improper punishment in any form.
- ✓ Provide employees with appropriate education and training and a safe and healthy work environment.

## 4 Social Inclusion

### 4.1 Customer Relations

The Group operates with the aim of “creating value for customers, employees, and shareholders.” Attracting and engaging new customers while maintaining and retaining existing customers are what a company exists and develops for. Despite the fierce competition in the market, we have maintained our advantage and actively cultivated and built relationships with customers to consolidate and develop customer relations, so that the Company can truly gain a competitive advantage. At the same time, we have established a service-oriented business model and optimized our service process, and applied innovative technology to control and improve product quality, providing products and services that meet customer needs in order to enhance customer trust and create a win-win situation.

#### Service and Grievance Reporting

We provide timely and efficient services to customers, ensure the quality and efficiency of customer grievance handling, and strengthen the control of product quality. Every customer’s problem is handled by dedicated personnel. The consistent maintenance process ensures prompt customer product maintenance and return/exchange. We also provide customers with transparent service channels to quickly collect and organize feedback and problems from each customer. We have established procedures for handling customer grievances :

1. Once a customer grievance is made, fill out the “Customer Service Report” and “Customer Service Record,” and notify relevant departments to handle the customer grievance.
2. Hold a project meeting for product or service confirmation and discussions according to the customer grievance.
3. After review by quality control personnel, fill out the “Abnormality Handling Form” for analysis, and proceed according to the “Procurement Management Procedure” and “Production Management Procedure.”
4. Quality control personnel verify the results, report to relevant units for confirmation before making a response to the customer grievance, and fill out the “Abnormality Handling Form.”
5. After the grievance is closed, it is included in regular review and confirmation items.

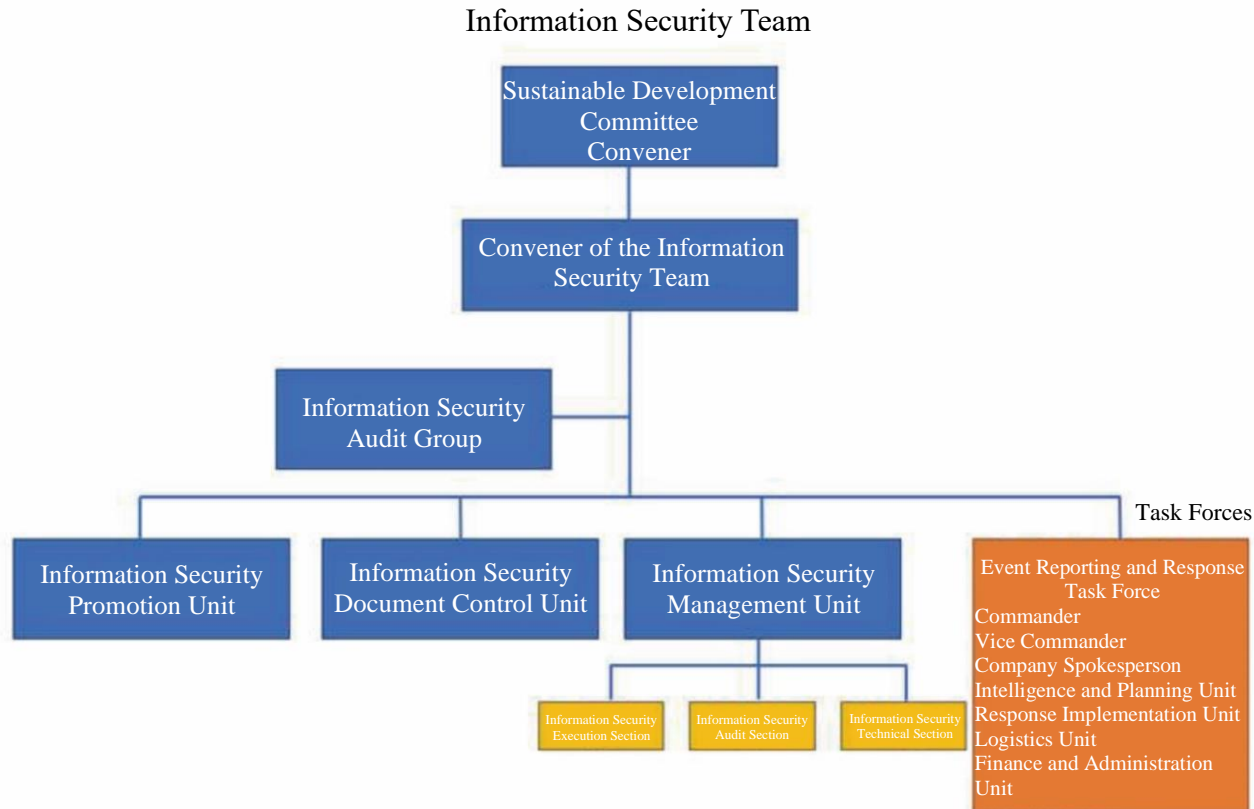

**Customer Grievance Channel**

## Customer Information Security and Privacy Protection

Solomon Data International is committed to respecting and protecting the privacy and confidentiality of customers, and has established relevant response measures and management regulations to protect the privacy of customers or investors. In order to maintain the effective implementation of the cybersecurity management system and personal data protection management system, ensuring the continuous and stable operation of cybersecurity management and personal data protection management and enhancing the overall cybersecurity and personal data protection management, the Company has established a functional team for information security, with the Sustainable Development Committee as the convener, to direct the Company's cybersecurity and personal data protection management and demonstrate the support of the management.

We received no grievances concerning breaches of customer privacy in 2023.

## 4.2 Talent Cultivation and Development

We value the labor rights of employees, create a happy and safe workplace, provide our colleagues with friendly and equal job opportunities, implement a gender equality policy, and create a mutually respectful atmosphere. We provide a competitive compensation level to increase the loyalty of employees to the Company, reduce employee turnover, and ensure the stable development of the Company's operations. The Company has a complete training system and organizes various training courses from time to time to enrich the professional skills of our employees and enhance their workplace competitiveness. Meanwhile, transparent career paths allow employees to anticipate their future career development. In addition, the Company has followed the principles of the ISO 45001 Occupational Safety and Health Management System to strengthen the Company's occupational safety and health management performance, effectively protecting the physical and mental health of employees.

### 4.2.1 Employee Overview

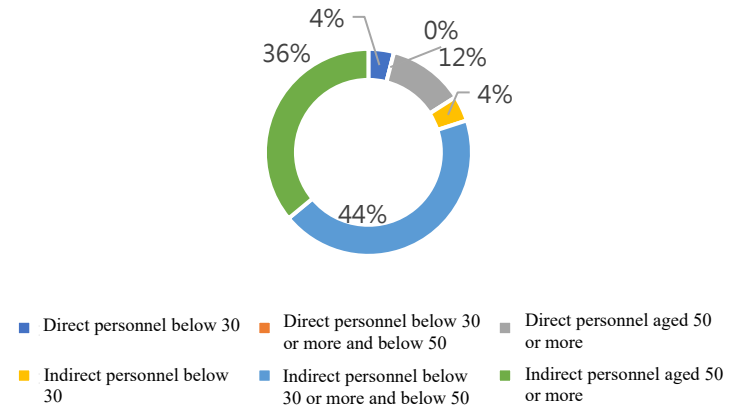

The Company continues to recruit more technical talent and employ local people to provide more comprehensive services. At the end of 2023, the Company had 26 employees. In addition, there were 6 non-employee workers, including dispatched security and cleaning personnel, to ensure the quality of the work environment.

Employee statistics by gender and age :

**Distribution of Employees by Gender in the Year**

**Distribution of Employees by Age in the Year**

### Employee Statistics by Gender and Age

Diversity statistics/Year				2021		2022		2023	
				22		25		25	
				Number of people	Percentage	Number of people	Percentage	Number of people	Percentage
Employees	Direct	Gender	Male	1	4.55%	1	4.00%	1	4.00%
			Female	8	36.36%	7	28.00%	3	12.00%
		Age	Below 30	0	0.00%	0	0.00%	1	4.00%
			30 or more and below 50	2	9.09%	2	8.00%	0	0.00%
			50 or more	7	31.82%	6	24.00%	3	12.00%
		Education	Postgraduate degrees	0	0.00%	0	0.00%	0	0.00%
			Colleges and universities	0	0.00%	0	0.00%	0	0.00%
			Others	9	40.91%	8	32.00%	4	16.00%
		Indirect	Gender	Male	6	27.27%	9	36.00%	11
	Female			7	31.82%	8	32.00%	10	40.00%
	Age		Below 30	0	0.00%	0	0.00%	1	4.00%
			30 or more and below 50	7	31.82%	10	40.00%	11	44.00%
			50 or more	6	27.27%	7	28.00%	9	36.00%
	Education		Postgraduate degrees	2	9.09%	2	8.00%	2	8.00%
			Colleges and universities	9	40.91%	13	52.00%	17	68.00%
			Others	2	9.09%	2	8.00%	2	8.00%

Note: The calculation method is as follows

Percentage of direct personnel below 30 = (Total number of direct personnel below 30 at the end of the year / Total number of employees at the end of the year)\*100%.

Percentage of indirect personnel with postgraduate degrees = (Total number of indirect personnel with postgraduate degrees in the year / Total number of employees at the end of the year)\*100%.

## Talent Recruitment and Diversity & Equality

Solomon Data International is mainly engaged in electricity (covering fuel-fired and gas-fired power generation systems), automated industrial products, displays, and electronic parts. A robust human resource is the key to the sustainable management of the Company. In order to attract outstanding talent, we provide competitive compensation and benefits to reward employees for their performance and long-term contributions, driving their loyalty to the Company and motivating them to be engaged in the Company.

In addition, the Company ensures information transparency and openness in promotions and provides employees with good job performance with promotion opportunities. The Company recruits and selects employees through open selection procedures while adhering to meritocratic principles and the philosophy of putting the right people in the right places. We strongly believe that “only with the right people can problems be solved.” Outstanding professional talent is the key to leading the Company toward creating performance and value and continuously accumulating experience in innovative fields in order to achieve sustainable management.

Education	Postgraduate degrees	0	0.00%	0	0.00%	0	0.00%
	Colleges and universities	1	4.00%	2	8.00%	4	15.38%
	Others	1	4.00%	1	4.00%	4	15.38%
Region	Taiwan	2	8.00%	3	12.00%	8	30.77%
	Overseas	0	0.00%	0	0.00%	0	0.00%

Note 1: The statistics are based on the total number of employees at the end of the year (December 31).

Note 2: New hire rate = (Total number of new employees in a specific category in the year / Total number of employees in the year)\*100%.

For example, female new hire rate = (total number of new female employees in the year / total number of employees in the year)\*100%.

Turnover rate = (Total number of employees in a specific category leaving the Company in the year / Total number of employees in the year)\*100%.

For example, the turnover rate of employees below 30 = (total number of employees below 30 leaving the Company in the year / total number of employees in the year)\*100%.

## Employee Performance Evaluation

The Company has established the Compensation Committee to regularly review the compensation policy and plan transparent evaluation and reward and punishment systems, creating a positive competitive atmosphere among employees. We uphold the concept of treating employees equally. We have different performance evaluation systems for general personnel, management personnel, sales personnel, and R&D personnel. Different performance evaluation and measurement systems are given according to different jobs, and evaluation and measurement results are used as the basis for year-end bonuses, salary adjustments, and promotions. We also incorporate employees' core skills and performance related to corporate social responsibility in the evaluation to strengthen the overall awareness of the employees and the Company about sustainable development, consolidating the Company's competitiveness in sustainable development.

Employees and their line managers can have direct communication about their performance evaluation results. For employees with outstanding performance, this can not only recognize their performance in the year, but also allow for discussion about setting goals for future career planning. On the other hand, employees with unsatisfactory performance evaluation results can directly communicate with their supervisors to find out their shortcomings in performance and make improvements. For employees who do not meet the minimum evaluation threshold, we will enhance guidance and conduct improvement tracking through the performance improvement plan to help improve the employee's job performance.

### Employee Performance Evaluation Percentage

## 4.2.2 Talent Cultivation

### Employee Education and Training

In order to improve the professional skills of employees, we formulate training plans and implement training targets every year according to the Company's development needs, so that the employees can advance further in their careers. Through internal training, we continue to pass on our skills and experiences to relevant departments in order to help employees formulate learning and development directions and use them as the basis for drawing out their personal career plans. When new employees report to work, they are informed by dedicated personnel of the Company's internal regulations and systems as well as occupational safety-related knowledge, and then their respective departments will provide them with special training.

We actively encourage our colleagues to take professional courses related to their job duties. Aiming for the continuous growth of our employees, we provide diverse learning channels, so that they can demonstrate their professionalism and achieve self-improvement. Each department drafts their education and training plans and organizes education and training according to their own needs. Employees' continuing education is divided into internal and external training. In response to the trend of diversified education and training in recent years, we give our colleagues access to more information in different aspects.

**Training Hours of All Employees**

**Employee Training Statistics by Category**

**Percentage of Employee Trained**

**Training Hours of All Employees**

Note: The average training hours for all employees are (Total training hours of all employees in the year / Total number of employees at the end of the year)

## Employee Salary and Benefit

Solomon Data International is committed to rationalizing the employee salary structure, regularly participating in market salary surveys, formulating reasonable salary and reward policies, and paying employees based on their positions, education and work experience, and expertise. The Company's compensation policy differentiates compensation based on employees' achievement of performance goals. The Company does not treat employees differently in terms of compensation, benefits, promotions, salary adjustments, work conditions, and employment rights. In order to make sure that employees' personal compensation can reflect their job performance, all employees regularly receive performance and career development reviews. The review results will be taken into consideration for the promotion of employees in the workplace, so that employees with special technical expertise can grow into professionals in their fields through efforts, and employees with management capabilities and leadership potential can also grow into management, providing them with plenty of space for career development. In addition, the Company holds regular labor-management meetings on a quarterly basis to promote benefit improvement and organizational harmony.

Item	Employee benefits
Basic benefits	The Company enrolls in labor insurance, health insurance, and pension systems and takes out group insurance for all employees.
Work-life balance and health	<ol style="list-style-type: none"> <li>1. According to related labor laws and regulations, employees are entitled to one health check-up each year.</li> <li>2. The Company organizes employee safety and health lectures from time to time and hires professional medical personnel to provide health consultations.</li> <li>3. We provide diverse club activities to allow employees to interact with each other after work while maintaining good health and well-being.</li> </ol>
Travel subsidies	<ol style="list-style-type: none"> <li>1. To encourage employees to enjoy both work and life and achieve balanced development in work, life, and leisure, we provide employees with travel subsidies.</li> <li>2. Discounts for accommodations and meals at contracted hotels.</li> </ol>
Family care	<ol style="list-style-type: none"> <li>1. We set up a warm, qualified breastfeeding room, creating a friendly breastfeeding environment in the workplace and supporting the breastfeeding of working mothers.</li> <li>2. The Company signed a collaborative agreement with HESS Educational Organization to provide employees with preferential childcare solutions.</li> </ol>
Other benefits	<ol style="list-style-type: none"> <li>1. Wedding cash gifts, bereavement money for employees or their family members who pass away, and childbirth cash gifts for employees or their spouses who give birth.</li> <li>2. Condolences money for employees hospitalized due to injury and illness</li> <li>3. Emergency aid for employees.</li> <li>4. We provide bonuses for the Mid-Autumn Festival, Dragon Boat Festival, and Chinese New Year to reward employees for their hard work.</li> <li>5. 10 free inter-bank withdrawals or transfers per month for payroll accounts.</li> </ol>

## Parental Leave

In accordance with related laws and regulations, the Company's employees who are eligible for unpaid parental leave may apply for such leave. We also encourage them to apply for reinstatement to return to work upon expiration of such leave.

Unpaid parental leave for employees/Year	Gender	Statistics		
		2021	2022	2023
Number of employees eligible for unpaid parental leave	Male	0	0	0
	Female	0	0	0
Number of employees who applied for unpaid parental leave	Male	0	0	0
	Female	0	0	0
Number of employees who should be reinstated from unpaid parental leave (A)	Male	0	0	0
	Female	0	0	0
Number of employees who were actually reinstated from unpaid parental leave (B) (including early reinstatement)	Male	0	0	0
	Female	0	0	0
Reinstatement rate (B/A)	Male	0	0	0
	Female	0	0	0
Number of employees still in employment for 12 months after reinstatement from unpaid parental leave in the previous year (C)	Male	0	0	0
	Female	0	0	0
Retention rate (C/B in the previous year)	Male	0	0	0
	Female	0	0	0

Note 1: The number of employees eligible for unpaid parental leave is based on the number of male and female employees who have applied for maternity leave and paternity leave in the past three years.

Note 2: Reinstatement rate = (Total number of employees actually reinstated in the year / Total number of employees who should be reinstated in the year)\*100%.

Note 3: Retention rate = (Total number of employees still in employment for 12 months after reinstatement in the previous year / Number of employees actually reinstated in the previous year)\*100%.

## Friendly and Warm Breastfeeding Room

Nurturing a healthy next generation not only benefits the family, but also facilitates sustainable corporate management and national social progress and development. In order to create a friendly workplace that ensures gender equality for working mothers, the Company has set up a breastfeeding room to reduce the burden of breastfeeding on employees, thereby satisfying their needs to take care of their children more comprehensively and thoughtfully.

## Reading Room

In order to stimulate employees to have higher efficiency and more diversified thinking at work, and to promote the Company's operation development and growth together, besides organizing internal education and training and book clubs from time to time, we have also planned an open book reading area to provide various books and magazines, so that employees can gain knowledge outside of their work field, and obtain physical, mental and spiritual growth.

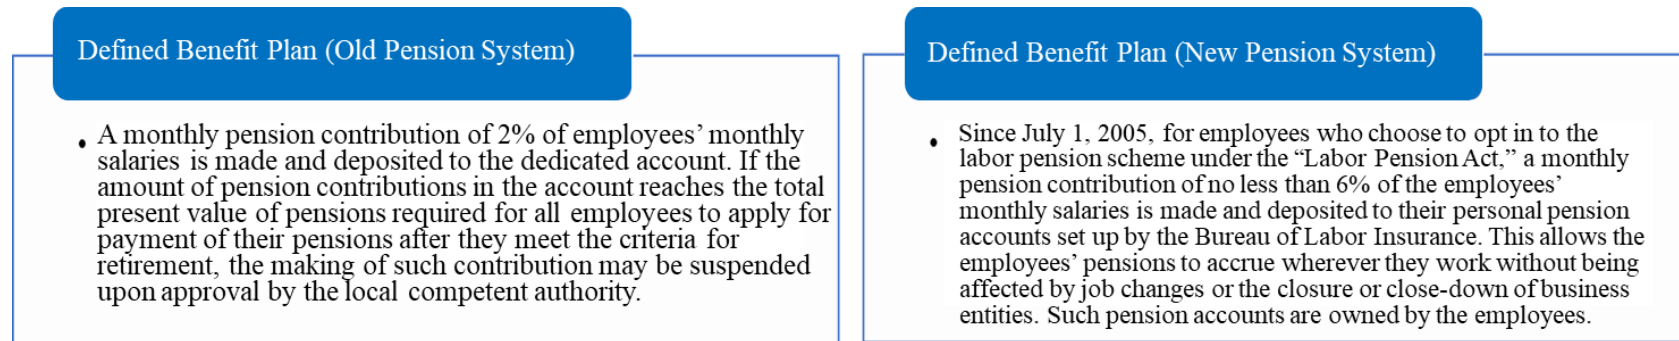

## Retirement and Benefits Policy

In order to secure the post-retirement life of employees, we have established pension plans for full-time employees. We also make a pension contribution of 2% of the total salary on a monthly basis and deposits it into a special account with the Bank of Taiwan in the name of the Labor Pension Fund Supervisory Committee to fully protect the rights and interests of employees.

Since July 1, 2005, Solomon Data International has had its defined contribution plan in place in accordance with the “Labor Pension Act.” The plan is applicable to employees who are of Taiwanese nationality. The Company deposits a labor pension distribution of 6% of the salary of the employees who choose to opt in to the labor pension scheme under the “Labor Pension Act” into their personal accounts with the Bureau of Labor Insurance every month. The pension is paid monthly or at once to the employees based on the amount of money in their personal pension accounts and the accumulated gains.

Pension statistics in 2023 : NT\$916(unit: NT\$ thousand)

In addition, the Company has also adhered to the principle of protecting employees. If employees' positions must be adjusted or they become unfit due to the Company's business development, the Company will give them early notice in accordance with the Labor Standards Act and provide them with sufficient time to do job handover and prepare for working in a new environment. The Company will also pay severance pay to the employees who become unfit according to the Labor Standards Act.

### 4.2.3 Human Rights Policy

We are committed to protecting employees’ fundamental human rights and supporting and following international human rights conventions, including the “United Nations Universal Declaration of Human Rights,” the “United Nations Global Compact,” the “United Nations Guiding Principles on Business and Human Rights,” the International Labor Organization’s “Declaration on Fundamental Principles and Rights at Work,” and local laws and regulations, to ensure that we provide a work environment that fully protects human rights. Solomon Data International respects the freedom of association of employees, cares for disadvantaged groups, prohibits child labor, eliminates all forms of forced labor and hiring and employment discrimination, and eradicates any act involving infringement and violation of human rights. We protect gender equality and treat all employees fairly. All our employees’ employment contracts are drawn up and signed in accordance with the law. Employees have the right to terminate their employment contracts. There are no relationships beyond employment contracts, e.g. forced (compulsory) labor, or discrimination within the Company. Solomon Data International’s compensation policy also ensures that the salary of employees is not differentiated due to gender, age, race, religion, or political stance.

**Solomon Data International’s human rights management policies and specific plans are summarized as follows :**

## Human Rights Protection

We comply with the labor human rights laws and regulations in each business location, and communicate important messages on human rights protection and labor rights protection to new and existing employees. Smooth labor–management communication helps promote labor–management collaboration, enabling employees to understand the Company’s production plans, business overview, and market conditions while allowing the Company’s management to timely grasp the labor conditions of the employees and even build a friendly workplace based on their needs. The Company complies with laws and regulations. Our internal human resource and administrative management complies with the local labor laws and regulations of each business location. At least one labor–management meeting is held every three months as required by law, with management representatives including the Chief Corporate Governance Officer and the head of the HR department to coordinate labor–management relations. Regular mutual communication and dialogue can promote labor–management collaboration and allow employees to express their opinions and seek better labor conditions from the Company, effectively improving workers’ status.

The Company has also established diverse communication channels. Through two-way communication, employees can fully express their opinions. Due diligence will be conducted after a grievance is received by dedicated personnel. The Company will keep the whistleblower’s personal information confidential, and will not treat the whistleblower unfavorably if the grievance is verified.

In 2023, the labor–management relationship in the Company was harmonious, and there were no incidents of human rights violations, gender inequality, harassment, or other labor–management disputes.

<b>Gender Equality and Harassment Prevention</b>	<b>Labor–management Meeting</b>	<b>Employee Communication Channels</b>
The Company has established the “Measures for the Prevention of Sexual Harassment in the Workplace and Principles for Establishing Guidelines on Grievances and Disciplinary Actions” to develop a grievance system and a handling procedure. The Company also regularly implements relevant education and training. There were no grievances on gender equality in 2023.	With the aim of working together to help the Company’s operations, we coordinate labor relations, promote labor–management collaboration, improve work efficiency, and ensure a workplace that protects the physical and mental health of employees. In 2023, a total of 4 labor–management meetings were held, and both parties engaged in various negotiations and operations to help protect each other’s rights and interests in a fair and just manner, achieving a win-win situation.	In order to build a good labor–management relationship, we have employee grievance mechanisms in place, including an employee grievance email address (hr@solomon.com.tw). All grievances made will be investigated and handled by the HR department or unit heads. There were no grievances made in 2023.

### 4.3 Occupational Safety and Health

To effectively control occupational safety and health in the offices and plants, provide employees with a safe work environment, and pay attention to their physical and mental health, we have complied with the Occupational Safety and Health Act and implemented the ISO 45001 Occupational Health and Safety Management System in accordance with the Group’s policy to adhere to the Company’s safety and health policy. By having all workers jointly adhere to the safety and health policy of the Company, we can build a safe, comfortable and healthy work environment.

#### Workers Covered by an Occupational Health and Safety Management System in 2023

Management system/laws and regulations	Inspection type	Number of people	Percentage
Occupational Safety and Health Act	Internal audit	25	100%
	Labor inspection	25	100%

### Hazard Identification and Risk Assessment

The Company has conducted hazard identification based on the hazards that each unit may face according to the nature of their work. We have established the “Hazard Identification and Risk Assessment Form” to list these possible hazards and conduct risk assessments on their frequency, likelihood, and severity (if they occur). According to the identified hazard types, we then formulate protective and preventive measures to reduce the likelihood and severity of these hazards.

### Incident Investigation

We have established incident reporting and investigation management procedures to systematize and document accident investigation, analysis, and statistics. With these procedures, in the event of an incident, personnel from relevant units can be contacted quickly to assist in on-site handling to reduce or prevent the expansion of the incident. We are committed to preventing the occurrence of disasters to ensure the safety of employees. We also provide education and promotional materials so that employees can understand how to prevent disasters and have something to refer to and follow when formulating or revising work rules.

### Incident Investigation and Handling Process

Incident type	Handling process
Near miss	Department concerned (fill in the “Incident Investigation Form”) → Occupational safety and health management personnel (investigation and analysis) → Department head (sign off) → Occupational safety and health management personnel (record retention).
Disasters	Department concerned (fill in the “Incident Investigation Form”) → Occupational safety and health management personnel (investigation and analysis) → Department head (sign off) → Unit head (sign off) → Occupational safety and health management personnel (record retention).
Work-related disasters	Department concerned (fill in the “Work-related Disaster Investigation and Handling Form”) → Occupational safety and health management personnel (investigation and analysis) → Administrative unit (investigate the current status of the injured employee and suggest approval of the employee’s leave for the work-related injury) → Department head (sign off) → Unit head (sign off) → Occupational safety and health management personnel (statistics and record retention).

### Measures for the Prevention of Occupational Safety and Health Impacts

The Company has established the “Contractor Occupational Safety and Health Management Procedure” to require contractors or individuals entering the Company’s plants or offices to follow relevant regulations. First, procurement or sales personnel explain the Company’s regulations on occupational safety and health management to the contractor, and then the person in charge of the workplace is responsible for applying for a work permit, informing the contractor of the working area and hazardous factors, and asking it to perform appropriate protective measures before it starts construction. During the construction, the person in charge will monitor the contractor’s compliance with the relevant regulations. Finally, occupational safety and health management personnel will formulate relevant regulations on contractor management, prepare contractor access cards, perform audits, and assist each unit in implementing contractor management.

Before the contractor starts construction, safety and health management personnel will hold a construction coordination meeting to explain the Company’s contractor-related regulations, and the contractor must fill out the “Work Permit Application Form” according to the operation details. If there is any hot work or special hazardous work, the contractor must apply for an additional hot work permit or special hazardous work permit, which will be verified by occupational safety and health management personnel.

## Work-related Injury Analysis

he work-related injuries that occurred at Solomon Data International in the past three years were mainly falls and cuts. After an incident occurred, we conducted relevant investigations immediately, and then formulated and promoted improvement measures according to the type of the incident, in order to reduce the recurrence of the same incident.

### Statistics on Work-related Injuries and Work-related Ill Health

Statistics/Year		2021	2022	2023
Total hours worked (Note 1)		43648	49800	49600
Fatalities caused by work-related injuries (Note 1)	Number of people	0	0	0
	Percentage	0	0	0
Severe work-related injuries (Note 2)	Number of people	0	0	0
	Percentage	0	0	0
Recordable work-related injuries (Note 3)	Number of people	1	0	1
	Percentage	4.58	0	4.03
Work-related ill health	Number of people	0	0	0
	Percentage	0	0	0
Recordable work-related ill health (Note 3)	Number of people	0	0	0
	Percentage	0	0	0

Note 1: The percentage is calculated per 200,000 working hours.

Note 2: Severe work-related injuries: Severe injuries causing employees unable or less able to recover to the state of health before the injuries within six months. However, the number of fatalities should be excluded from the statistics.

Note 3: Recordable work-related injuries or work-related ill health: Work-related injuries or work-related ill health that lead to any of the following circumstances, such as death, departure from work, work restrictions or transfer of work, medical treatment beyond first aid, or unawareness, or major injuries or ill health diagnosed by physicians or other licensed medical professionals (even if they do not cause death, departure from work, work restrictions or transfer of work, medical treatment beyond first aid, or unawareness). The statistics should include the number of fatalities.

### Statistics on Work-related Injuries and Work-related Ill Health by Type

Type/Year		2021	2022	2023	Hazard and improvement description
Type of work-related injuries	Falling down	1	0	0	There were personnel falling down from plastic chairs. Thus, the plastic chairs have been replaced with safety chairs.
	Falls	0	0	1	Traffic accidents when commuting to work

### Occupational Safety and Health Education & Training and Meetings

To enhance the overall occupational safety awareness and work safety of employees, we focus on occupational safety-related education and training. New employees must complete 3 hours of occupational safety and health education and training after joining the Company, so that they can understand the Company’s occupational safety policy. Active employees must also complete 3 hours of online occupational safety training courses every year, and after the courses, we arrange tests and surveys to ensure course quality. In addition, the Company also organizes regular emergency response and disaster prevention drills to ensure that employees can respond to emergencies and reduce the impact of disasters.

The Company holds an occupational safety meeting every three months, and labor and management representatives are sent to participate in the meetings. The meetings examine the Company’s existing occupational safety policies, review recent occupational accidents, and respond to employees’ occupational safety-related opinions. The Company also timely communicates the latest relevant information to employees through internal websites and employee suggestion boxes while collecting their opinions and feedback on occupational safety and health to establish smooth communication channels. The engagement of employees allows the Company to formulate complete and company-oriented occupational safety policies.

## Employee Health Management and Health Promotion

To ensure the physical and mental health of employees and maintain the Company's overall competitiveness, new employees are required to undergo health check-ups when they report to work. The Company also provides health check-ups more frequently than as required by law to active employees. For employees with abnormal health check-up results, the Company will have on-site medical personnel examine the health check-up report data of previous years to conduct evaluation and make recommendations, and carry out health management-related measures and preventive vaccination based on the health check-up results.

In addition, the Company regularly arranges for employees to receive breast cancer, cervical cancer and oral cancer screening, and bone mineral density tests by integrating medical resources to ensure the health of our employees, prevent the occurrence of work-related injuries and ill health, and enable early diagnosis and treatment at the time of occurrence. The Company organizes a health check-up at the end of each year. In 2023, 78% of employees received a health check-up.

In addition to complying with government regulations on employee health and continuously improving employee health and safety and hygiene performance, we also provide employees with various health promotion materials from time to time, including those related to the prevention of metabolic syndrome and dengue fever, flu vaccination, and a smoke-free workplace, providing them with a safe, secure and healthy workplace.

## 4.4 Social Engagement

As a member of the overall society, we give back to the society, fulfill our social responsibility, and are interdependent with our investors, employees, local communities, and other stakeholders. To get the ball rolling, we exert our influence and fulfill our corporate social responsibility. We work with local organizations at our business locations to ensure that resources can be provided to those truly in need. In addition to engaging in public welfare, we also respond to the Group's call and make donations to the charitable foundation founded by the Group. We will make the best use of resources through the collective efforts of the public, striving to make the society a better place.

Item	Activity	Implementation performance
1	Tamkang University Industry-Academia Collaboration Program for Cultivation of R&D Elites	Donation NT\$ 210,000
2	Sponsoring the Development Center for Spinal Cord Injuries for rehabilitation and training expenses	Donation NT\$7,500
3	National Taiwan University Cancer Center	Donation NT 2,860,000
4	Genesis Social Welfare Foundation	Donation of invoices
5.	Cih Yue Charity Foundation	Donation NT\$ 100,000

## SASB Index

Topic	SASB code	Disclosure item	Content	Corresponding chapter
Product Safety	TC-HW-230a.1	Description of approach to identifying and addressing data security risks in products	The Company has established the cybersecurity policy which covers four dimensions of control measures, in order to avoid improper use, leakage, tampering, and destruction of data due to human error, malicious intent, or natural disasters. The Company prevents possible risks and hazards based on the organizational, personnel, physical, and technological aspects of control.	2.3.1 Risk Management Strategy
Employee Diversity	TC-HW-330a.1	Percentage of gender and racial/ethnic group representation for (1) management, (2) technical staff, and (3) all other employees	(1) 1 male and 1 female. (2) 0. (3) 11 male and 12 female; all of Taiwanese nationality.	4.2.1 Employee Overview
Product Lifecycle Management	TC-HW-410a.1	Percentage of income from IEC 62474-compliant products (%)	No income from IEC 62474-compliant products.	None
	TC-HW-410a.2	Percentage of eligible products, by revenue, meeting the requirements for EPEAT registration or equivalent	As the products of Solomon Data International are not end products, it is impossible to conduct investigations on products that meet the requirements for EPEAT registration, etc. Therefore, relevant data can hardly be collected.	Not disclosed in the report
	TC-HW-410a.3	Percentage of income from products certified to an energy efficiency certification	No income from products certified to an energy efficiency certification.	None

Topic	SASB code	Disclosure item	Content	Corresponding chapter
	TC-HW-410a.4	Weight of end-of-life products recovered, percentage recycled	As the products of Solomon Data International are not end products, relevant data can hardly be collected.	Not disclosed in the report
Supply Chain Management	TC-HW-430a.1	Percentage of Tier 1 supplier facilities audited in the RBA Validated Audit Process (VAP) or equivalent, by (a) all facilities and (b) high-risk facilities	Please refer to 3.3 Sustainable Supply Chain in the report.	3.3 Sustainable Supply Chain
	TC-HW-430a.2	Tier 1 suppliers' (1) non-conformance rate with the RBA Validated Audit Process (VAP) or equivalent, and (2) associated corrective action rate for (a) priority non-conformances and (b) other non-conformances	Please refer to 3.3 Sustainable Supply Chain in the report.	3.3 Sustainable Supply Chain
Materials Sourcing	TC-HW-440a.1	Description of the management of risks associated with the use of critical materials	Due to the fluctuation of international prices of metal materials, the Company has placed long-term orders to ensure supply sources and prices, and actively sought secondary suppliers or alternative materials.	3.1 Climate Action
Activity Metrics	TC-HW-000.A	Number of units produced by product category	LCD modules: 238 (thousand pcs).	2.1.3 Business Performance and Brand Value
	TC-HW-000.B	Area of manufacturing facilities	Plant area: 172 <i>ping</i> (568.5976 m <sup>2</sup> )	Not disclosed in the report
	TC-HW-000.C	Percentage of production from owned facilities	Self-production rate: 67.53%.	2.1.3 Business Performance and Brand Value

## Climate-related Information of TWSE/TPE<sub>x</sub> Listed Companies

### Risks and Opportunities of Climate Change for the Company Related Countermeasures Adopted by the Company

Item	Countermeasures												
1. Describe the monitoring and governance of climate-related risks and opportunities by the Board of Directors and the management.	The Company has established the Sustainable Development Committee, chaired by the General Manager, and its various teams conduct identification of climate-related risks and opportunities through discussions in meetings.												
2. Describe how the identified climate risks and opportunities affect the Company's business, strategy and finance (short-, medium-, and long-term).	<table border="1" style="width: 100%; border-collapse: collapse;"> <thead> <tr style="background-color: #d9e1f2;"> <th style="width: 25%;">Risk</th> <th style="width: 25%;">Potential financial impact</th> <th style="width: 25%;">Opportunity</th> <th style="width: 25%;">Potential financial impact</th> </tr> </thead> <tbody> <tr> <td style="text-align: center;"><b>Rising costs of raw materials</b></td> <td>Fluctuating prices of raw materials can result in increased production costs</td> <td style="text-align: center;"><b>Using more efficient production and distribution processes</b></td> <td>Increasing utilization efficiency to reduce operating costs</td> </tr> <tr> <td style="text-align: center;"><b>Rising average temperatures</b></td> <td>Increased use of energy leads to higher electricity bills</td> <td style="text-align: center;"><b>Using new technologies</b></td> <td>Changing customer preferences to improve competitiveness</td> </tr> </tbody> </table>	Risk	Potential financial impact	Opportunity	Potential financial impact	<b>Rising costs of raw materials</b>	Fluctuating prices of raw materials can result in increased production costs	<b>Using more efficient production and distribution processes</b>	Increasing utilization efficiency to reduce operating costs	<b>Rising average temperatures</b>	Increased use of energy leads to higher electricity bills	<b>Using new technologies</b>	Changing customer preferences to improve competitiveness
Risk	Potential financial impact	Opportunity	Potential financial impact										
<b>Rising costs of raw materials</b>	Fluctuating prices of raw materials can result in increased production costs	<b>Using more efficient production and distribution processes</b>	Increasing utilization efficiency to reduce operating costs										
<b>Rising average temperatures</b>	Increased use of energy leads to higher electricity bills	<b>Using new technologies</b>	Changing customer preferences to improve competitiveness										
3. Describe the financial impact of extreme climate events and transition actions													
4. Describe how climate risk identification,	We implement the following in accordance with our risk management policy												

Item	Countermeasures
<p>assessment, and management processes are integrated into the overall risk management system</p>	 <ul style="list-style-type: none"> <li>Step1 <ul style="list-style-type: none"> <li>•The Sustainable Development Committee members complete the collection of climate and environmental background information</li> <li>•Climate risk and operational scope assessment</li> </ul> </li> <li>Step2 <ul style="list-style-type: none"> <li>•Establish a list of climate risks and opportunities</li> </ul> </li> <li>Step3 <ul style="list-style-type: none"> <li>•The Sustainable Development Committee conducts analysis of climate risks and opportunities and their operational impacts</li> <li>•Determine material risks</li> </ul> </li> <li>Step4 <ul style="list-style-type: none"> <li>•Establish implementation strategies and set targets</li> </ul> </li> <li>Step5 <ul style="list-style-type: none"> <li>•Review the effectiveness of the implementation strategies and targets from time to time through Sustainable Development Committee meetings</li> </ul> </li> </ul>
<p>5. If scenario analysis is used to assess resilience to climate change risks, the scenarios, parameters, assumptions, analysis factors, and main financial impacts used shall be described.</p>	<p>In response to the impact of climate-related risks and opportunities on the Company's strategies and financial planning, we adopt corresponding strategies with reference to the TCFD's climate scenario analysis.</p>

Item	Countermeasures	
<p>6. If there is a transition plan in place to manage climate-related risks, specify the content of the plan, and the indicators and targets used to identify and manage physical risks and transition risks.</p>	Risk	Countermeasure
	<p><b>Rising costs of raw materials</b></p>	<ul style="list-style-type: none"> <li>● Focus on product categories, implement centralized procurement where goods are purchased in large quantities and at low prices, and reduce inventory types.</li> <li>● Introduce a lean production model in plants to optimize the production process and eliminate waste.</li> <li>● Establish long-term partnerships with suppliers to strive for more favorable procurement prices.</li> <li>● Actively seek alternative raw materials to increase product liquidity and flexibility in response to rising costs of raw materials.</li> <li>● Formulate long-term production procurement plans, including fixed price contracts, to mitigate the impact of sudden energy cost changes on business.</li> <li>● Track the fluctuation of commodity prices and grasp the procurement schedule to reduce the risk of future price fluctuations.</li> </ul>
	<p><b>Rising average temperatures</b></p>	<ul style="list-style-type: none"> <li>● Formulate the Company’s energy-saving measures, regularly maintain air-conditioning equipment, and increase energy efficiency.</li> <li>● Reduce paper consumption, carry out document digitization, and reduce carbon emissions.</li> <li>● Execute carbon inventory every year to understand the Company’s main sources of carbon emissions, facilitating the planning of carbon reduction measures.</li> </ul>
<p>7. If internal carbon pricing is used as a planning tool, the basis for setting the price shall be stated.</p>	<p>No internal carbon pricing is currently in use.</p>	

Item	Countermeasures						
<p>8. If climate-related targets are set, the activities covered, the scope of GHG emissions, the planned schedule, and the progress of each year shall be explained; if carbon offsets or renewable energy certificates (RECs) are used to achieve the targets, the source and number of the carbon offsets or the number of the RECs shall be described.</p>	<p>To control the impact of climate change on the operations of the Company, we set short-term and medium- to long-term targets and regularly review and track the energy consumption and GHG emissions of our offices and plants in each region to achieve the targets and continuously expand the effectiveness of energy conservation and carbon reduction.</p> <table border="1" data-bbox="658 478 2007 624"> <thead> <tr> <th data-bbox="658 478 1106 549">Target</th> <th data-bbox="1106 478 1554 549">Short-term (2027)</th> <th data-bbox="1554 478 2007 549">Medium- to long-term (2030)</th> </tr> </thead> <tbody> <tr> <td data-bbox="658 549 1106 624">GHG emissions</td> <td data-bbox="1106 549 1554 624">Decrease by 2%</td> <td data-bbox="1554 549 2007 624">Decrease by 5%</td> </tr> </tbody> </table> <p>(Note: Compared with the base year of 2023)</p> <p>The Company's strategies for energy saving and carbon reduction and GHG reduction are as follows:</p> <ol style="list-style-type: none"> <li>1. Water resource saving: The Company has fully switched to the use of water-saving facilities to reduce water resources wasted and used, such as touchless water faucets, urinal flush valves, and water-saving toilets. Energy-efficient air conditioning: We reinforce the control of the use of air conditioning (e.g. by having Taipower install water chiller unit temperature adjusters to keep the air conditioning at 26°C), and has installed air conditioning timers, which can help reduce about 2% of electricity consumption (carbon emissions) every year.</li> </ol>	Target	Short-term (2027)	Medium- to long-term (2030)	GHG emissions	Decrease by 2%	Decrease by 5%
Target	Short-term (2027)	Medium- to long-term (2030)					
GHG emissions	Decrease by 2%	Decrease by 5%					
<p>9. GHG inventory and assurance status, as well as reduction targets, strategies, and concrete action plans (indicated in 1-1 and 1-2) separately.</p>	<p>As shown in the table below</p>						

1-1 GHG inventory information

Describe the GHG emissions (tCO<sub>2</sub>e), intensity (tCO<sub>2</sub>e/NT\$ million), and data coverage and assurance status for the most recent two years.

The Company's GHG emissions inventory is currently under self-management and disclosed voluntarily in order to understand the current trends and respond to them early. It has not yet been assured by an external third-party verification body.

Category	2023		2022		Assurance body and assurance description (verification certificate)
	Total emissions (tCO <sub>2</sub> e)	Intensity (tCO <sub>2</sub> e/NT\$ million)	Total emissions (tCO <sub>2</sub> e)	Intensity (tCO <sub>2</sub> e/NT\$ million)	
Scope 1					The Company implemented an ISO 14064-1 GHG inventory project in 2023, and the Company's emissions have been verified by DNV Business Assurance Co., Ltd., which mainly included: Category 1 emissions mainly from mobile combustion sources and fugitive emission sources. Category 2 emissions from purchased electricity. Category 3 emissions from employee business travel. Category 4 emissions mainly from products purchased by the organization.
Parent company	2.4366	0.01	1.9984	0.01	
Scope 2					
Parent company	67.7997	0.26	56.4987	0.27	
Scope 3					
Parent company	41.1945	0.16	114.2290	0.55	

Note: SOLOMON Data International's consolidated operating income in 2022 was NT\$208.31 million and the consolidated operating income in 2023 was NT\$259.04 million.

1-2. GHG reduction targets, strategies, and concrete action plans

Describe the GHG reduction base year and its data, reduction targets, strategies, and concrete action plans, and the achievement of the reduction targets.

To control the impact of climate change on the operations of the Company, we set short-term and medium- to long-term targets and regularly review and track the energy consumption and GHG emissions of our offices and plants in each region to achieve the targets and continuously expand the effectiveness of energy conservation and carbon reduction.

<b>Target</b>	<b>Short-term (2027)</b>	<b>Medium- to long-term (2030)</b>
GHG emissions	Decrease by 2%	Decrease by 5%

(Note: Compared with the base year of 2023)

The Company's strategies for energy saving and carbon reduction and GHG reduction are as follows:

1. **Water resource saving:** The Company has fully switched to the use of water-saving facilities to reduce water resources wasted and used, such as touchless water faucets, urinal flush valves, and water-saving toilets. We have also enhanced the water leakage management system, and check pipes and toilets from time to time to reduce water leakage and losses.
2. **Energy-efficient air conditioning:** We reinforce the control of the use of air conditioning (e.g. by having Taipower install water chiller unit temperature adjusters to keep the air conditioning at 26°C), and has installed air conditioning timers, which can help reduce about 2% of electricity consumption (carbon emissions) every year.

The logo features the word "SOLOMON" in a large, bold, white, sans-serif font. Below the "N" in "SOLOMON", the letters "e-s" are written in a smaller, white, sans-serif font.
